An Aero Electronic Conversion Kit transforms a Kwik-Lock™ to a PowerLock. A rear cap is required. The system is shown above with an aluminum bows, fabric front and rear caps and optional remote control.

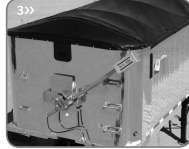

Aero's Power Lock allows you to cover and uncover your load from the comfort of your cab.

- Operates with our cab-mounted switch
- Optional remote lets you run it from outside the cab

- Quick and efficient to use
- Fast and easy to install
- Works on the Aero Kwik-Lock and other major brands of tarps

- Industry's best spring tension for superior performance in windy conditions

Features highlighted are relevant to all Aero Roll Tarps.
