AVALANCHE LINERS

# HIGH PERFORMANCE LINERS FOR:

BINS • HOPPERS • DUMP BODIES • FARM EQUIPMENT • OFF ROAD TRUCKS

## OUR HISTORY

Avalanche Liners, a division of Polymer Industries, has been producing high quality liners for demanding applications for over 15 years. We have a close working relationship with Polymer Industries, a leader in manufacturing a complete range of plastics for over 40 years. No other plastic liner company has this kind of control over the quality of the finished product you as the customer receive.

Our specially formulated liners will protect your equipment from harsh abrasives and high heats. They are designed to allow whatever you are hauling, spreading, or plowing to slide right off the surface.

## BENEFITS OF OUR LINERS

### FASTER RELEASE OF MATERIAL WITH LESS EFFORT

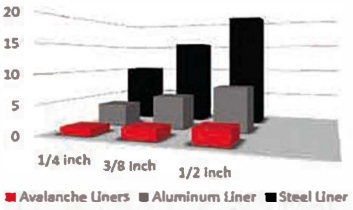
Our liners create a polished finish to speed up unloading materials on the first raise of the hydraulics. Sticky, frozen or wet material in vehicles without our liners can require higher lifts or multiple attempts to empty all the material, which can damage and significantly shorten the lifespan of the hydraulic systems.

### DIFFERENT LINERS FOR DIFFERENT APPLICATIONS

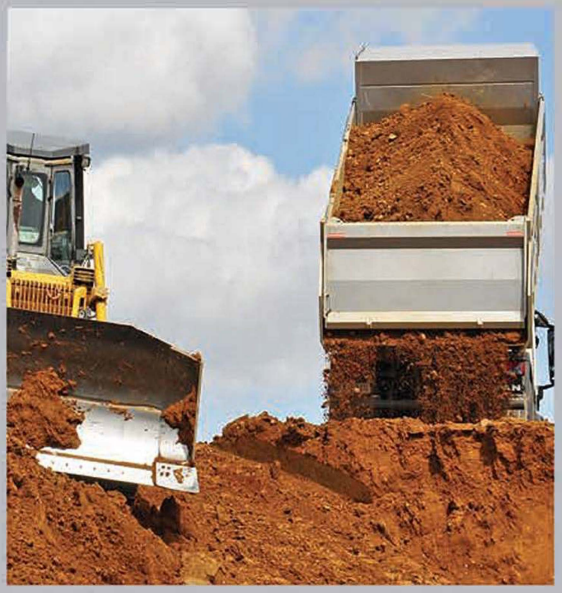
Regardless of what you plan to haul or the vehicle type, Avalanche Liners offers a variety of thicknesses and high performance materials to choose from. Each liner is designed to be long lasting and installed for a perfect fit.

### INCREASED STRENGTH AND RESISTANCE WITH LESS WEIGHT

Avalanche Liners weigh significantly less than Aluminum or Steel liners and include better abrasion resistance, in addition to chemical and corrosion resistance.



Pounds Per Square/Ft.



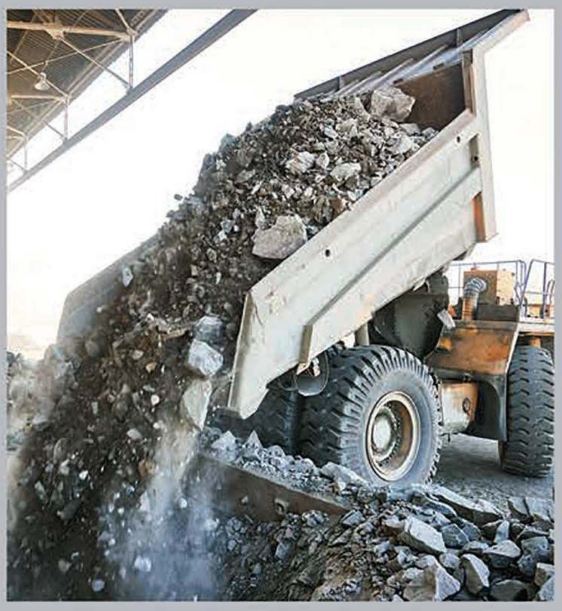
## MEDIUM DUTY

Our Medium Duty liners are manufactured from High Molecular Weight Polyethylene (HMW-PE). This tough plastic liner is designed for dirt, clay, or farm commodities.

### FEATURES

Extruded HMW-PE
Good sliding surface
UV protection
Eliminates freezing
Added water protection

| SIZES | inch / mm |
|---|---|
| Thickness | 0.25 - 0.50 / 6 - 12.7 |
| Width | Up to 144 / 3657 |
| COLOR | White or Black |



## HEAVY DUTY

Heavy Duty liners are manufactured from Ultra High Molecular Weight Polyethylene (UHMW-PE). This tougher plastic liner is designed for heavy and larger rock.

### FEATURES

Compression molded UHMW-PE
Better sliding surface
High impact strength
3-4 times more wear than HMW
Temp. range: +180°F to -86°F
5 year warranty available

| SIZES | inch / mm |
|---|---|
| Thickness | 0.25 - 0.50 / 6 - 12.7 |
| Width | Up to 192 / 4875 |
| COLOR | Gray or Black |

## HIGH TEMPERATURE

Our High Temperature liners are manufactured from a specially formulated Ultra High Molecular Weight Polyethylene (UHMW-PE). This is our toughest liner designed for temperatures up to 400°F.

### FEATURES

Compression molded UHMW-PE
Toughest liner for hot asphalt
Best sliding surface
Added lubricity
Lifetime warranty available

| SIZES | inch / mm |
|---|---|
| Thickness | 0.25 - 0.50 / 6 - 12.7 |
| Width | Up to 192 / 4875 |
| COLOR | Dark Gray |
